

Completeness: 3Color

Weston Dransfield

March 12, 2016

Outline

Description

3COLOR = $\{\langle G \rangle \mid \text{the nodes of } G \text{ can be colored with three colors such that no two adjacent nodes are the same color}\}$

Example

Example

The Problem

Is a given graph G a member of the *3COLOR*?

The Problem

Is a given graph G a member of the *3COLOR*?

- ▶ This is tough to decide, but easy to verify!

The Verifier

$V =$ "On input $\langle G, c \rangle$,

1. Check that c includes 3 colors.

The Verifier

$V =$ "On input $\langle G, c \rangle$,

1. Check that c includes 3 colors.
2. Color each node of G as specified by c .

The Verifier

$V =$ "On input $\langle G, c \rangle$,

1. Check that c includes 3 colors.
2. Color each node of G as specified by c .
3. For each node, check that each adjacent node is not the same color.

The Verifier

$V =$ "On input $\langle G, c \rangle$,

1. Check that c includes 3 colors.
2. Color each node of G as specified by c .
3. For each node, check that each adjacent node is not the same color.
4. If all checks pass accept, otherwise reject."

The Verifier

$V =$ "On input $\langle G, c \rangle$,

1. Check that c includes 3 colors.
 2. Color each node of G as specified by c .
 3. For each node, check that each adjacent node is not the same color.
 4. If all checks pass accept, otherwise reject."
- Step 3 has largest time complexity of $O(n^2)$. 3COLOR is in NP because it can be verified in polynomial time.

Constructing the Reduction

Construct a transformation f from $3SAT$ to $3COLOR$.

Constructing the Reduction

Construct a transformation f from $3SAT$ to $3COLOR$.

1. Establish Truthiness

Constructing the Reduction

Construct a transformation f from $3SAT$ to $3COLOR$.

1. Establish Truthiness
2. Force variables to be true or false

Constructing the Reduction

Construct a transformation f from $3SAT$ to $3COLOR$.

1. Establish Truthiness
2. Force variables to be true or false
3. Use these subgraphs to create a graph that is 3 colorable iff variables are satisfiable

Constructing the Reduction - Truthiness

Constructing the Reduction - Variables

Constructing the Reduction - Variables

Constructing the Reduction - OR

$$x \vee y$$

Constructing the Reduction - OR

Constructing the Reduction - Clause

Transformation

How to construct the transformation

Transformation - Forward

Forward proof

Transformation - Backward
